The 4th International Summer School

4-22 JULY 2016 WROCLAW, POLAND

Organizers

- Faculty of Civil Engineering
- Faculty of Environmental Engineering
- Faculty of Electrical Engineering
- Faculty of Mechanical and Power Engineering
- International Office

Summer School provides didactic activities: lectures, laboratories and projects carried out in groups of 4-6 people under the supervision of individual academic staff. The programme of Summer School also includes a course of Polish language and trips to many interesting places in Wrocław and the Lower Silesia region.

Graduation certificate will contain a final grade which will be included in the student's achievements.

Participant profile: students of the first, second and the third stage of study (PhD) at the following fields:

Power Engineering, Electrical Engineering, Civil Engineering and Environmental Engineering or related scientific areas.

Teamwork is dreamwork!
